Quiz 3.1

$\frac{-1}{x_0} \rightarrow \frac{0}{x_1}$

Rumus : $x = x_0 \quad y = y + m$

$y = x_0$

$dx = x_0 - x_1 \quad dy = y_1 - y_0$

$= -1 - 0 \quad = -1 - 0$

$= -1 \quad = -1$

$m = dy - dx \quad y = y + m$

$= (-1) - (-1) \quad = -1 + 0$

$= 0 \quad = -1$

$(x, y)_1 = (-1, -1)$

$x_1 = 0$

$dm = 0 - (-1) \quad dy = 0 - (-1)$

$= 1 \quad = 1$

$m = 1 - 1 \quad y = 0 + 0$

$= 0 \quad = 0$

$(x, y)_2 = (0, 0)$
